ePAR Forms Dollars to Percent Changes

Introduction

We have added the ability to use percentages or dollar amounts when entering information on the funding grid.

Add/Update Position ePAR

On this form, we have created a new field called Allocated Budget Amount. This field stores budget information as a dollar amount for the position. On the grid you enter either the dollar amount or the percentage of the allocated budget amount you want to be applied to a chartfield string. If you are splitting the funding among different chartfield strings, the new Reconcile button will help ensure 100% of the salary is funded.

Hire ePAR

The funding grid now has two new columns. You can see the old and new budget and percentage columns.

- Old columns contain information based on compensation from job data if an incumbent exists, or from the Allocated Budget Amount on the position if no incumbent exists.
- New columns display information based on the updates you enter onto the form.

Again, you can enter the dollars amounts or percentages of funding for each funding source.

Edit Existing Job ePAR

When you first navigate to the funding grid on this form, the default information is based on the existing compensation of the incumbent.

- Once you change the Annual Amount, the two new columns appear displaying the Old Budget Amount and Old Percentage of Distribution.
- The newly entered Annual Amount and percentage are shown in the Budget Amount and Percent of Distribution columns.
