1 Test scores, like other measurements, are not perfectly precise. The confidence bands that are shown for the Total Scores above mark the ranges in which the test taker's true scores probably lie. To obtain the confidence band for each section score, subtract one point from and add one point to the score.
 2 The percentile ranks of scores are the percentages of test takers who received the same scores or lower scores. The percentile ranks are updated on May 1 every year to reflect the results from previous calendar year(s).
